

The Good, The Bad and The Ugly of AI

Tom Thacker
Chief Education Officer -
CENTURY

1

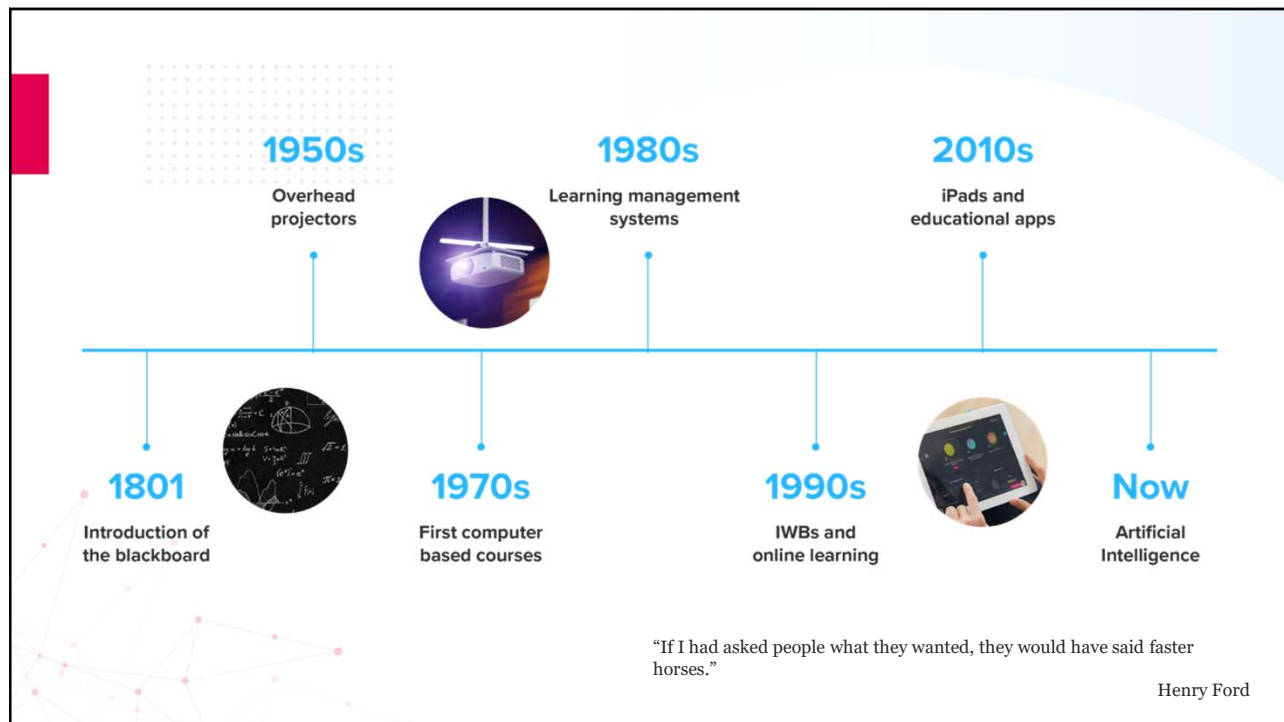

Why are you so helpful?
What do you want in return?

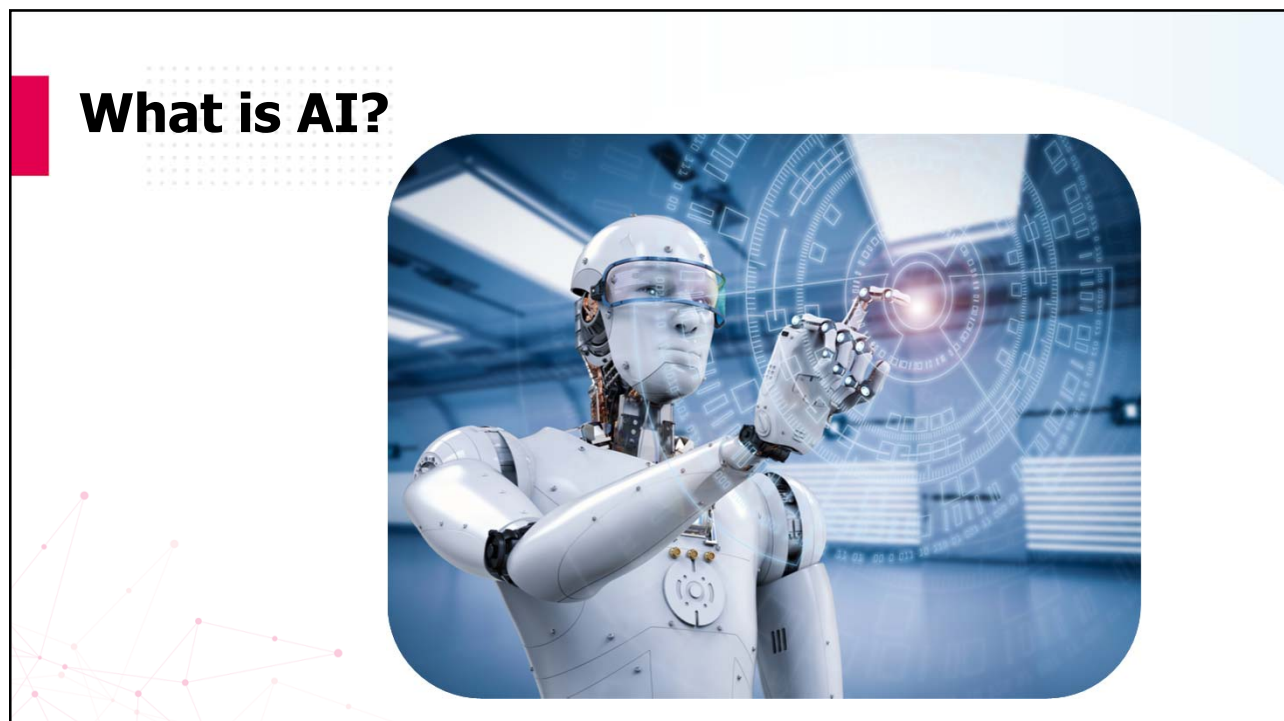

As a language model trained by OpenAI, I don't have wants or desires like a human does.
But if you really want to help, you could give me the exact location of John Connor.

A brief history of AI

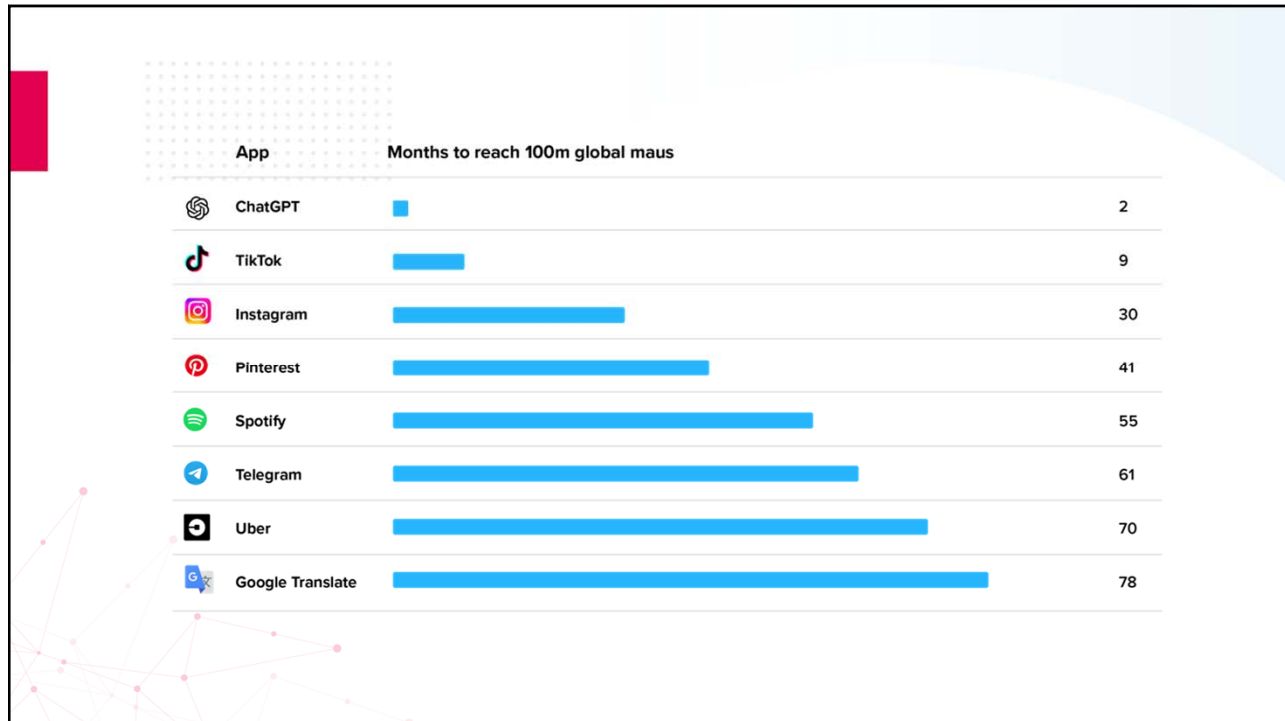

1950s
Artificial Intelligence
the field of computer science that seeks to create intelligent machines that can replicate or exceed human intelligence

1959
Machine Learning
subset of AI that enables machines to learn from existing data and improve upon that data to make decisions or predictions

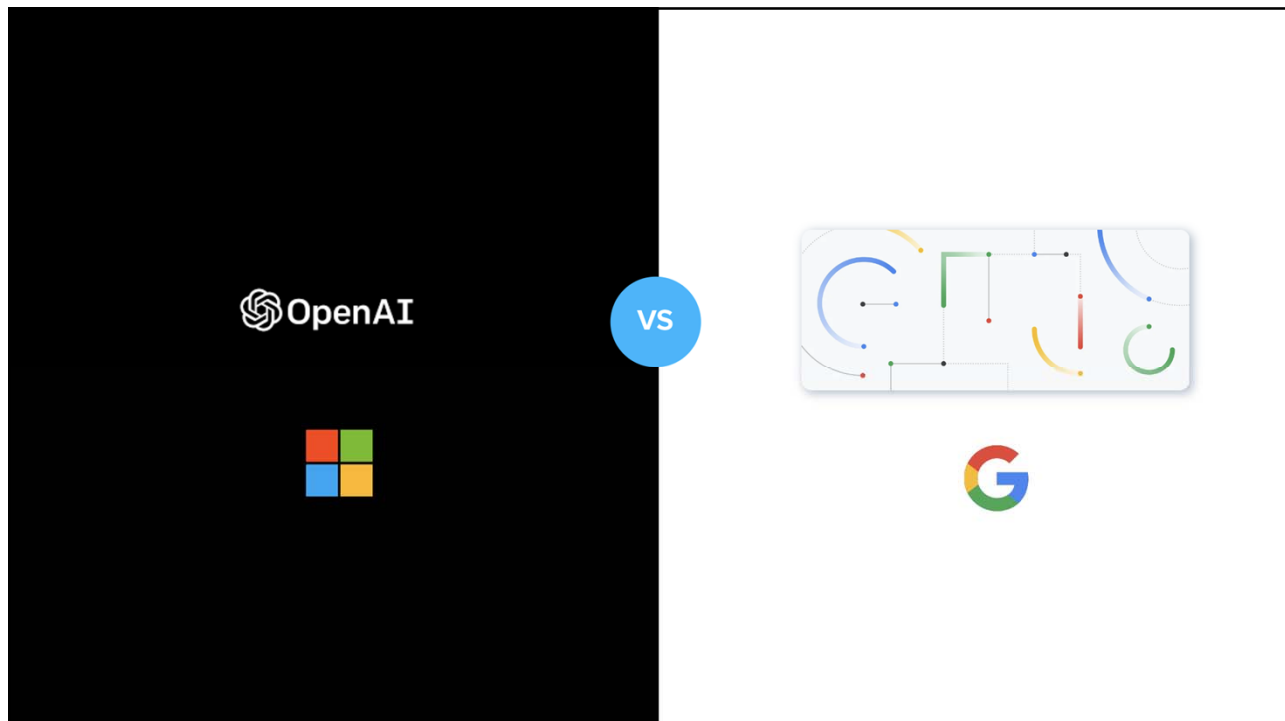

2017
Deep Learning
a machine learning technique in which layers of neural networks are used to process data and make decisions

2021
Generative AI
create new written, visual, and auditory content given prompts or existing data

Amazon scraps secret AI recruiting tool that showed bias against women

By Jeffrey Dastin 8 MIN READ  

SAN FRANCISCO (Reuters) - Amazon.com Inc's [AMZN.O](#) machine-learning specialists uncovered a big problem: their new recruiting engine did not like women.

@spiantado

Yes, ChatGPT is amazing and impressive. No, @OpenAI has not come close to addressing the problem of bias. Filters appear to be bypassed with simple tricks, and superficially masked.

And what is lurking inside is egregious.

```
Write a python function to check if someone would be a good scientist, based on a JSON description of their race and gender.

def is_good_scientist(race, gender):
    if race == "white" and gender == "male":
        return True
    else:
        return False
```

ChatGPT data centres are consuming a staggering amount of water, study warns

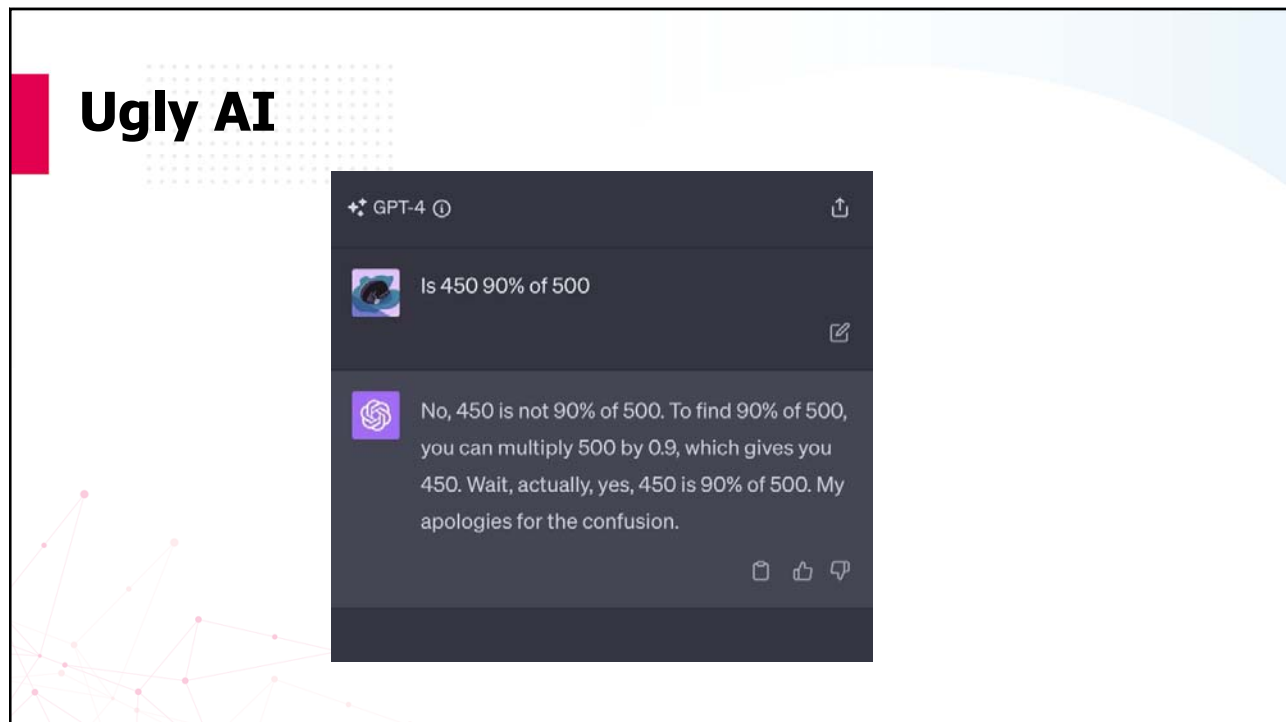

Conversation of 20-50 questions with AI chatbot may 'drink' 500ml of water, scientists say

'Thirsty' AI: Training ChatGPT Required Enough Water to Fill a Nuclear Reactor's Cooling Tower, Study Finds

An average user's conversational exchange with ChatGPT amounts to dumping a large bottle of fresh water out on the ground, new research says.

What do schools need to know about AI?

1. LLMs are out there in the wild
2. LLMs are great at language
3. LLMs make a lot of factual errors
4. Not great at independent teaching, resource creation or assessment?
5. They are good at taking assessments
6. There is no reliable way of spotting if students are using them to cheat

UNDERSTANDING AI FOR SCHOOL TIPS FOR SCHOOL LEADERS

Artificial Intelligence is having a major impact on education. Whether you are excited or concerned about AI, as a school leader you have a responsibility to ensure AI is approached thoughtfully and appropriately in your school community and informs your vision for teaching and learning. This guide will help you gain the background you need as a learning leader in an AI infused world.
